### Work History:

#### 70KFT

May 2016-Present

Web Developer Intern

- Worked on localization of website in Craft CMS, twig, and js.
- Developed webpages, and parts of applications for multiple clients while working with QA, and management.
- Collaborated with team of 4 developers focused on pixel perfect development, responsive web development, and clean code.

#### The Iron Yard

October 2016-February 2017

Front-End Developer

- Worked at the coding boot camp to learn the foundation of front-end development including: HTML5, CSS3, JavaScript and React.
- Built and deployed multiple web applications and learned about responsive design, web standards and agile methodologies.
- Utilized Trello to organize and prioritize projects in a collaborative team environment.
- Worked within groups of different expertise to learn how to approach problems from multiple angles.
- Utilized GitHub, Terminal, Gulp, Node.JS, JavaScript, CSS, HTML, React.JS, jQuery, Sass and Responsive Web Design in applications.

#### Key Project:

<https://beer-me-finder.herokuapp.com/#/>- In this project technical skills were utilized to build a web application that pulled a brewery and Google Maps API to showcase the breweries near the user. The application also displayed the brewery's beers sorted by IBU and ABV levels.

**Tools:** HTML5, CSS3, JavaScript, React.JS, Sass, Express, Node.JS, Gulp

#### Pinnacle Group

May 2011-October 2016

Technical Recruiter/Delivery Manager

- Brought in over \$715,383 in GM and over \$5,543,457 in revenue throughout tenure.
- Led a team of onshore and offshore recruiters to meet performance recruiting goals.
- Recruited and sourced candidates for multiple clients in the banking and healthcare industry through the internal database, external job boards and additional resources.

#### Education:

The Iron Yard

Coding Boot Camp - Front-End Development

#### Additional Honors:

Eagle Scout

University of North Texas

Bachelor of Arts in Advertising
